ASPEN CUSTOM ELECTRONICS

CREATING CONNECTION - WITH OUR CLIENTS AND TECHNOLOGY

Founded in Stillwater Oklahoma in 2007, Aspen Custom Electronics has grown into a recognized leader in the Audio/Video industry. Aspen's unique commitment to control systems and user interactions lead to many successful projects and has allowed Aspen to grow. The company has several employees who have been featured in national publications and have been featured speakers at national events relating to the Audio and Video industry. While the luxury residential division of Aspen has been extremely successful, in 2017 Aspen made the decision to transition its business to focus completely on Commercial, Professional and the Broadcast Audio/Video market. As a result of growth in these areas, Aspen opened its first office outside of Stillwater in downtown Tulsa to provide more personalized services to our clients in Northeastern Oklahoma and Northwest Arkansas.

From the first day of Aspen's existence in 2007, the focus of the company has been the interaction between the technology and the technology user. Aspen was formed with the idea that the best designed, most advanced and most feature rich systems were essentially useless to our clients without the best designed control and easiest to use interfaces. Of course, our systems are designed with the latest technology and provide the best features, but the core of our company believes that the best systems make interaction easy and available. That's why Aspen believes that our goal is "Creating Connection" both with the end user and the technology that we provide.
